Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, and 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jansens (US5558794) in view of Ishii et al (US4575620).

Jansens discloses a resistance heating cable/method of manufacturing comprising a heating element extending longitudinally along the cable wherein the element has a positive temperature coefficient (PTC) and is self regulating, and capable of being used in a car seat (Figure 1A, column 2, line 26- column 3, line 8). Jansens does not disclose a semiconductor PTC comprising a polymer having a high density polyethylene matrix including carbon. Ishii et al discloses a semiconductor PTC comprising a polymer having a high density polyethylene matrix including carbon (column, 5, lines 35-44). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included a semiconductor PTC comprising a polymer having a high density polyethylene matrix including carbon of Ishii et al in the heating cable of Jansens because a semiconductor PTC comprising a polymer having a high density polyethylene matrix including carbon allows for a more uniform heating.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAWNTINA FUQUA whose telephone number is (571)272-4779. The examiner can normally be reached on Monday-Friday 8-4:30 pm.
